

# Designing and Coordinating a Mapping Project

There is no one way to collect data in the field and it will vary by context. However, there are some essential topics and questions all project managers and OSM communities should consider when **Designing and Coordinating a Mapping Project**.

- **2.1 Defining Needs and Requirements** poses questions to answer when defining the scope of the project, such as purpose, geographic scale, and what features to map, as well as ensuring that the project takes into account the various contexts and stakeholders involved in the project.
- **2.2 Safety, Security, and Logistics for Field Operations** contains guiding questions to help plan for project logistics and security concerns. As all field operations involve some level of risk and can involve many moving parts, it is vital to conduct a safety, security, and logistics review before beginning field work on any project, regardless of experience.

These first two sections provide guiding questions and considerations, however, it is important to understand that each project will have different variables that might not be covered. When designing a project, be sure to use past experience, consult with other organizations, and meet with stakeholders to ensure that you are covering all variables.

- **2.3 Selecting Hardware** provides a guide on the various hardware, such as phones and laptops, that could be needed for a project. Additionally, HOT has provided lists of specific models that have been used in HOT field projects that have proven suitability.
- **2.4 Trainings and Workshops** covers the requirements for running trainings as well as providing resources such as example agendas and materials to provide.

---

## Further resources and reading

In addition to this Toolbox, there exists several guides that were developed to help teams in the project planning process, some of which were borrowed from to develop this Toolbox.

- **Open Mapping for the SDGs** - Humanitarian OpenStreetMap Team (HOT) published a guide for launching and growing open mapping initiatives at the national and local levels to achieve the Sustainable Development Goals (SDGs). This guide can be found at: <https://hotosm.github.io/gpsdd-documentation/>
- **Open Cities Project Guide** - the World Bank Global Facility for Disaster Reduction and Recovery (GFDRR) and Humanitarian OpenStreetMap Team (HOT) published a guide that can be downloaded at <http://www.opencitiesproject.org/guide/>.
- **Participatory Mapping Toolkit** - Humanitarian OpenStreetMap Team (HOT) published a guide for open mapping projects in the context of refugees. The full toolkit can be downloaded at <https://www.hotosm.org/downloads/Toolkit-for-Participatory-Mapping.pdf>
