6.2 Humanitarian Data Exchange (HDX)

Humanitarian Data Exchange (HDX) is a data platform for storing and sharing humanitarian data. The platform is managed by OCHA's Centre for Humanitarian Data. Types of data available on HDX include: Data includes:

- · Geospatial datasets
- CSVs & spreadsheets
- text & image files

Tools and Technology Needed:

- Computer
- · Internet Connection

Training Activity

Presentation: Estimated time:

In this activity, you will practice using Humanitarian Data Exchange (HDX) for downloading OSM data for use in QGIS. HDX is an online-based tool, so you will need to be patient with internet connectivity.

Downloading data

- 1. Visit data.humdata.org
- 2. In the Find Data search bar, type your area of interest (i.e. Liberia, Tanzania), and click search
- 3. Browse list of available datasets
- 4. Select a dataset of interest
- 5. Download data file

Adding data

- 1. Visit data.humdata.org
- 2. In the Add Data window, select 'Upload File'
- 3. You will need to sign in or register as an organization
- 4. Make sure data file meets HDX standards
- 5. Upload data file
